Table 1-Composition Rating Key

Possible Score:	<u>10</u>					<u>12</u>
Rating:	1 - 2 = Poor		1 - 3 = Poor			
	3 - 5 = Fair		4 - 6 = Fair			
	6 - 8 = Good		7 - 9 = Good			
	9 - 10 = Excellent		10 - 12 = Excellent			

NOTES

¹ The absence of this habitat element does not lower or raise the habitat rating for the wildlife species being considered.

² When evaluating small tracts (1+ acres) in urban or suburban settings, the composition figures may be considered as percentages of the landowners tract.

* An Asterisk: Indicates that the presence of this habitat element is essential. If the minimum acreage composition of that element is not present, then it must be provided before the habitat can be evaluated further.

HOME RANGE PARCEL NUMBER _____
